Quentin Blanchais

Designing the next generation of AI powered software management tools used by over 80% of the Fortune 500.

Greater Sydney Area

Summary

I'm a French designer based in Sydney, with 15 years' experience building products for Asian and American markets at Atlassian, Meta, and eBay.

My career has been defined by high-impact innovation, including a patent for Jira's agentic experience and media recognition from VentureBeat and TechCrunch for my work on Meta's Express Wi-Fi. My process is rooted in discovery and insight—defining bold product directions and refining them into polished, interactive experiences. I partner closely with product managers and engineers to ensure strategic alignment and design excellence at every stage of the lifecycle.

Experience

Atlassian

6 years 6 months

Lead Product Designer

April 2024 - Present (2 years)

Sydney, New South Wales, Australia

Expanded agentic capabilities within Jira via the Team25 launch, designing a first-of-its-kind interface that enables seamless task delegation to AI teammates and integrates with partners like Figma and GitHub.

Closed critical feature gaps for high-touch enterprise customers by architecting a customizable onboarding framework that allowed 1,200+ organizations to embed their unique "ways of working" directly into the product.

Senior Product Designer

October 2019 - April 2024 (4 years 7 months)

Sydney, Australia

Uplifting Jira's core work item experience by modernizing the visual appeal and ease of use, ensuring the interface remains intuitive while scaling to support increasingly complex task data.

Expanding work item capabilities and performance to enable faster interaction and higher-value task management, directly improving the daily workflow for millions of users.

Optimizing the information hierarchy of the Jira issue view to reduce cognitive load, allowing teams to navigate and update work items with greater speed and precision.

Bot MD

Product Design Consultant

July 2018 - January 2023 (4 years 7 months)

Singapore, Singapore

Bot M.D is a fast-growing startup providing a clinical A.I assistant for doctors, turning any hospital content into searchable information directly accessible in the app.

Meta

Product Designer

August 2018 - October 2019 (1 year 3 months)

Singapore

- Drove growth by designing Express WiFi products, increasing product awareness, and user acquisition.
- Executed our Product & Marketing strategy aligned with our internal teams.
- Onboarded and supervise our design team (2 designers, 1 researcher), delivering end-to-end product features and user testing.
- Scoped design releases with our engineering.
- Envisioned and presented to our internal stakeholders the design roadmap of next product features based on user insights and analytics.

Accomplishments:

- Successfully launched of our brand website expresswifi.fb.com scheduled for World Mobile Congress 2019 (TechCrunch and, VentureBeat articles links below).

- Successfully launched first iteration of a scalable product website to support our user acquisition initiative. +30% Return On Investment, +2.3X increase of monthly active users for our home Wi-Fi product with a low 10% churning.

eBay

UX/UI Design Lead at eBay Classifieds Group - Emerging Markets

June 2017 - August 2018 (1 year 3 months)

Shanghai City, China

- Drove revenue growth, following our market strategy, with new features/improvements for Vivanuncios.com.mx and Gumtree.co.za.
- Conducted user research and testing on prototypes and live sites and design end-to-end user journeys.
- Led the new UI styling vision across our platforms and closely work with QA & engineering teams on our A/B testing and full releases.

Accomplishments:

- Redesigned Vivanuncios Search & Result flow for real estate vertical including a dynamic map search feature.
- Redesigned the Item Listing Flow for Vivanuncios which increased completion rate by +16%, feature revenue by + 24% through removing pain points, simplifying the interaction model, and implementing new UI styling.
- Redesigned the Item Listing Flow for Gumtree with positive results in reduced scam/spam while increasing completion rate by +10% utilizing our learnings from the Vivanuncios initiative.
- Designed seller-related email touch-points strategy and templates to increase user engagement and features revenues resulted in +13.6K sessions/month.

MING Labs

2 years 8 months

Senior Product Designer

August 2016 - May 2017 (10 months)

Shanghai City, China

- Led the product design for e-commerce services, mobility apps, connected consumer products, automotive digital experience for startups and large corporations.
- Led the execution of our design process through users and competitors research, features definition, information architecture, wire-framing, prototyping, visual design, and animations.
- Client management and project management with the leadership team.

Accomplishments:

- Led the redesign of the digital in-car experience of the 2018 Denza EV vehicle (BYD & Mercedes Benz joint-venture) for the Chinese market.
- Led the initial and continuous app design for the start-up bottlesXO (a beverage delivery service in China & Southeast Asia) until their successful Pre-A funding round (\$3.4M) in 2017.
- Lead designer for the 2nd iteration of the Yi Action Camera (competitor of Go-Pro) app for the startup Yi Technology in 2016 (received \$90M funding the same year).

Product Designer

October 2014 - July 2016 (1 year 10 months)

Shanghai City, China

Wonderlabs Studio

Digital Designer

October 2013 - October 2014 (1 year 1 month)

Shanghai City, China

Drive growth and product awareness by designing interactive products for marketing events for Jaguar, Air France, Bosch, and Swarovski. Conducted researches on latest technologies implementable and crafted large-scale prototypes.

Accomplishments:

- Designed Christmas interactive event for Swarovski shop, increased direct foot traffic to store.
- Designed interactive installation for Air France “France In The Air” exhibition in Shanghai, New York and Paris, experienced by 360,000+ visitors.

B-Reel

Jr. Product Designer

March 2013 - August 2013 (6 months)

Greater New York City Area

As part of the product team, I participated in product definition phase, conducted user and competitor researches, developed interaction model and supported UI design and engineering for Google and Kraft Heinz Company.

Accomplishments:

- Designed a second screen app experience for Youtube Live Channels.

- Designed Google Glass visual interfaces for an internal feature film of Google Glass.
